

ABSTRAK

Nilai perusahaan dapat dikatakan sebagai persepsi investor terhadap suatu perusahaan yang dapat dilihat dari harga saham perusahaan. Penelitian ini bertujuan untuk menguji pengaruh *current ratio*, *return on asset*, dan kebijakan dividen yang diprosiksa dengan *dividend payout ratio* terhadap nilai perusahaan yang diprosiksa dengan *present book value* pada perusahaan *food and beverages* yang tercatat di Bursa Efek Indonesia periode 2012-2016.

Populasi dalam penelitian ini sebanyak 15 perusahaan, diperoleh dengan menggunakan metode *purposive sampling* pada perusahaan *food and beverages* yang tercatat di Bursa Efek Indonesia periode 2012-2016. Berdasarkan kriteria yang telah ditentukan maka diperoleh sampel sebanyak 12 perusahaan. Metode analisis yang digunakan adalah analisis regresi linier berganda dengan alat bantu aplikasi SPSS (*Statistical Product and Service Solution*) versi 20.

Hasil penelitian menunjukkan bahwa variabel *current ratio* dan *return on asset* berpengaruh signifikan terhadap nilai perusahaan sedangkan kebijakan dividen berpengaruh tidak signifikan terhadap nilai perusahaan.

Kata Kunci: *current ratio*, *return on asset*, kebijakan dividen, nilai perusahaan.

ABSTRACT

The current value of the company reflects on future earnings and market indicators in assessing the company as a whole. Company value can be regarded as investor perception to a company which can be seen from share price of company. This research aims to examine the influence of current ratio, return on assets, and dividend policies proxied by dividend payout ratio against the value of companies proxied by present book value in food and beverages companies recorded in Indonesia Stock Exchange at 2012-2016 period.

The population in this research as many as 15 companies, obtained by using purposive sampling method on food and beverages companies which is listed in the Indonesia Stock Exchange period 2012-2016. Based on the criteria that have been determined then obtained a sample of 12 companies. The analysis method used is multiple linear regression analysis with using SPSS application tools (Statistical Product and Service Solution) version 20.

The results showed that the variable current ratio and return on assets have a significant influence on firm value while dividend policy has no significant influence on firm value.

Keywords: current ratio, return on assets, dividend policy, corporate value.
