ABSTRACT

This study aims to analyze the role of the East Java Province Education Council, the extent to which the East Java Provincial Education Board's Organizational Performance is performing its role. The study population consisted of all members of the board of the East Java Province Education Board.

The object of this research is the Management of the East Java Province Board of Education Organization from the aspect of operational activities, and aspects of human resources, roles and functions and facilities of the organization. First, internal problems are human resources, even though the management consists of people who are experts in their fields, but because most of them are not full time, so they cannot carry out their duties optimally, but only work on projects.

Second, the unhealthy organizational structure in determining the duties and roles of members of the organization. There are variations in the performance of the East Java Provincial Education Board regarding tasks and roles, but the division of labor (job description) is unclear. Third, institutional issues related to financial funds and facilities, are obstacles to realizing an independent organization as mandated by the Law.

Important advice that needs to be revitalized is the East Java Provincial Education Council Organization, as well as the principles contained in the autonomy of education. Realizing the democratization of education, by involving the community together with the government through communication actions with the aim of reaching consensus.

Keywords: Role and Function of Education Board, Communication Act, Consensus, and Revitalization.
