Dear Triyonowti Triyonowati,

the manuscript Does Innovation Efficiency Affect Financial Performance ? The Role of Ownership Concentration , submitted to Investment Management and Financial Innovations Journal, needs to be revised.

Comments: the author must take a close look at the manuscript requirements. They are not too rigid, but we recommend to meet them. Therefore, we ask the authors to make every effort to meet the requirements, as it will provide the quality of their materials and will make it easier for the editorial staff to set the manuscript for publication.

<https://www.businessperspectives.org/index.php/journals/investment-management-and-financial-innovations#submission-guidelines-for-authors>

Please, keep in mind that we are reviewing three types of articles in the journal, namely:

- research paper, which is a final report on the finished original experimental study (the structure is Abstract, Introduction, Literature review, Method, Results, Discussion, Conclusion)
- theoretical paper, which is devoted to theoretical study of the problem, which complies with the journal's scope (the structure is Abstract, Introduction, Theoretical Basis, Results, Discussion, Conclusion)
- review paper, which is a study of concrete scientific problem, which complies with the journal's scope and is conducted based on the materials of the scientific publications (the structure is Abstract, Introduction, Literature review, Generalization of the main statements, Discussion, Conclusion).

You should decide on the type of article and this will determine its structure and presentation style.

<https://www.businessperspectives.org/index.php/journals/investment-management-and-financial-innovations#submission-guidelines-for-authors>

Please, keep in mind that

- research paper, which is a final report on the finished original experimental study (the structure is Abstract, Introduction, Literature review, Method, Results, Discussion, Conclusion)

Check out what should be in this or that section and correctly distribute the material into sections. Do not introduce new sections. Do not divide sections into small subdivisions, including by introducing subheadings. Specify the title and purpose of the study!

The number of words in the paper may vary from 4000 to 6000. Considering the issue concerning the calculation of the number of words in the paper, the information about the authors, title, abstract and keywords, list of references and appendices should not be included. The number of sources, in the list of references, should be determined by an author directly but be on average within 30-50. In the review articles, this number can be significantly higher. Supplementary materials should not exceed 5 pages.

The screenshot shows a Gmail interface with an open email. The email content is as follows:

The Abstract (its volume is 150-250 words) should contain the following sequence of presentation of the material - relevance, purpose, result, conclusion. The result should be devoted to most of the Abstract volume. You should provide quantitative indicators of the demonstration of the research result.

The purpose of keywords is to provide the insight to the reader into the contents of the paper. They should reflect the area of the research. The number of keywords should be 5-10 in average. There should not be the sentences, but the words or word groups. If the object of the study is not mentioned in the title of the paper (including the country, the region), it should be added to the list of keywords. There is no need to replicate words from the title of the manuscript.

You need to concretize JEL codes. (double-digit) If earlier the author was not aware of this classification system, he/she should attentively look through it in order to have a common understanding of all the areas defined in it http://www.aeaweb.org/jel/jel_class_system.php. The codes, indicated by the author should clearly reflect the research area. The author is welcome to use the codes from two or three areas, if they are covered in the research.

The Introduction (this is half a page-page of text) should be devoted to the relevance of the research topic and the formulation of the problem in general.

The Literature review also requires revision and consistency of the presentation of the material. It should be subordinated to the purpose of the study and should be completed with a statement of goal. The Literature review of the analyzed sources should be 40-50. If you assume hypotheses, then after that, give the hypotheses (all together and do not insert text between them).

Then the Methods should be presented.

The Result section is the main section of the article.

Then there should be a Discussion section. There should be a discussion of the study results, comparison with previous ones, a discussion of why the authors have exactly such results, determination of further prospects.

The Conclusion section is built incorrectly. There should be such logic - point out the purpose of the study, briefly demonstrate the result obtained, point out what conclusions should be drawn from it.

Reduce the list of sources significantly!

The deadline for revisions is 2022-12-07

Dear authors,

Also, the plagiarism report attached.
Please remove plagiarism and ABC.

The authors should remove the text that is more reminiscent of textbooks both in content and in the form of presentation.

Our journal strictly observes the principles of publication ethics, including when talking about citing the works of other scientists and the works they published earlier. Any loanwords, including text loans (even insignificant), are unacceptable without mentioning their author.

We kindly ask you to pay attention to the widespread problem of wrong citation when Author A somehow gives (mentions, retells) the text fragment from the work (published by Author B), which contains the reference to other work (published by Author C). In this case there are two options of correct citation:

- 1 – cite the work of Author B and note that he/she, in turn, cited the work of Author C;
- 2 – directly mention the work of Author C as well and cite it.

Do not forget that you can also use direct citations, that is why please use the quotation marks and when citing the source please note the page from which this quotation was taken.

You should be absolutely sure that you did not violate the principles of publication ethics. If there are at least small doubts that there can be loanwords in your text, we kindly ask you to check the manuscript for plagiarism by yourself using the special instruments (plagiarism detection software).

Please pay attention that you are obliged to indicate weblink on the journal.

For your personal and article's promotion, we recommend you to upload your paper on IDEAS, SSRN, ResearchGate etc. whenever possible. For improvement of the citation and for the possibility to find potential co-authors and readers for your future publications.

We encourage you to share information about the published paper with your colleagues (via e-mail or share article on Twitter and LinkedIn) and subscribe to our pages. Subscription will give you the opportunity to keep abreast of all events and relevant articles. You may send out press releases to local media and publish internal newsletters. It's a good idea to post information about preliminary calculations and research at figshare <https://figshare.com/>

We highly recommend to create a Publons, ResearcherID, ORCID, Scopus Authors ID and Mendeley profiles and complete them, that helps you to promote yourself as an author and a reviewer, also helps to find potential co-authors and readers for your publications, it also gives more experience on the editorship.

We will be grateful for your help in promoting your article and our journal in general at your university and through other possible communication channels.

Wish you all the best!

Kind regards,
