## ***ABSTRACT***

*This research aimed to examine the effect of Good Corporate Governance and financial ratios on the financial distress of Property and Real Estate companies listed on the Indonesia Stock Exchange (IDX). The independent variables was Good Corporate Governance which was referred to as managerial ownership, institutional ownership, audit committee, and financial ratios which was referred to as Current Ratio, leverage was referred to as Debt to Assets Ratio, and profitability was referred to as Return On Assets.*

*Based on determined criteria, there were 14 Property and Real Estate companies listed on the Indonesia Stock Exchange (IDX) for 5 years of observation (2018-2022) as the sample. Moreover, the data collection technique used purposive sampling. The data analysis technique used multiple linear regression with SPSS (Statistical Product and Service Solution) Version 26 application.*

*The result showed that managerial ownership, institutional ownership, audit committee, liquidity ratio (Current Ratio), and leverage ratio (Debt to Assets Ratio) affected financial distress. However, the profitability ratio (Return On Assets) did not affect financial distress.*

*Keywords:* good corporate governance, financial ratios, financial distress
