ABSTRACT

This research examines the effect of dividend policy (DPR), profit growth (PL), and companies' growth (GROWTH) on firm value (Tobins' Q) at mining companies listed on the Indonesia Stock Exchange (IDX). The research applies quantitatively. Furthermore, the population consists of mining companies listed on the Indonesia Stock Exchange (IDX) which share the dividend during 2020-2024. The data were collected using purposive sampling, in which the sample was based on the criteria given. In line with that, 21 samples from 91 mining companies were gained. Therefore, there were 105 data observations during 5 years. Moreover, the data were analysed using multiple linear regression. The result shows that DPR has a negative effect on the firm value at mining companies listed on IDX. Meanwhile, PL has a positive effect on the firm value at mining companies listed on IDX. Likewise, GROWTH has a positive effect on the firm value at mining companies listed on IDX.

Keywords: *dividend policy (DPR), profit growth (PL), companies' growth (GROWTH), and firm value (Tobins' Q).*
